THIS IS UNEVALUATED INFORMATION

25X1

1. The containers for fuel near Hnevice nad Labem /O51/F62 GSQS 4346 Central Europe 1:250,000/ were constructed during World War II by the Germans and expanded by the Czechs after the war.
2. The storage area was connected with the Stalin Works in Most by underground pipes, and was to be connected with the port of Bratislava also by underground pipes. Part of the pipes were already laid in Moravia and Bohemia. Pipes also ran from the storage area (which measured about 2,000 x 200 m.) to the banks of the Elbe River, which enabled the loading and unloading of tankers whenever the river was navigable.
3. The storage area, closely guarded and enclosed with a wire fence, was under the administration of Benzina, National Enterprise, Roudnice nad Labem /N 50-25, E 14-15/, a distribution firm. (Benzina also had offices on Hybernaska street in Prague.)
